

SEÁLPÁC® MA-S

Servo magazine denester

SEÁLPÁC®

Forming Innovations

SEALPAC® MA-S

Compact, fully electric and available in both single and double lane execution: thanks to its servo-drive, this denester offers an unlimited variety in movements.

Benefits at a glance

- Available in two different capacities (800 and 1,200 mm)
- Airless concept: nothing other than electricity required
- Compact design
- Maintenance-friendly due to lubrication-free construction
- Easy integration into existing packaging line due to the C-shape
- Unlimited variety of motion sequences thanks to axes with servo-drive
- Hygienic design
